Members of the Waynesboro Rotary Club Visiting Our Nursery.

After guaranteeing our trees and plants to be delivered in good condition, we further agree to replace at one-half price any that fail to grow the first season.

**Terms.** For cash in full with order, we allow 5 per cent discount, or a liberal premium in free stock. No discount is allowed unless cash in full accompanies order, but are accepted and booked when 25 per cent of the amount of the order accompanies the same.

**Varieties and Quantities.** In case you do not find listed the variety, quantity or grade desired, write us for further information and our Descriptive Catalog.

**Making Up Orders.** Do not fail to give sizes, quantities, and varieties wanted. Also give Shipping Point, if different from Post Office and approximately when you would like your stock shipped. Six at dozen rate; 50 at 100 rate; 300 at 1,000 rate.

## Fruit Trees

Planters in various communities demand different sizes and varieties, so we offer Apple in a large assortment of varieties and trees in six different sizes. All of our stock is clean, healthy and true to name, bearing a State Inspection Certificate. We are especially careful in keeping our stock true to name. You should be equally as careful in knowing that the orchard you plant is true to name. Our list of varieties is carefully worked out so that either a commercial or home orchard planter can make a selection suitable for any requirement. We suggest the following varieties as a selection for home orchards furnishing fruit from the earliest to the latest. Yellow Transparent, Early Harvest, Duchess, Sweet Bough, Smoke House, Grimes Golden, Delicious, Lowry.

### VARIETIES.

**Albemarle Pippin.** Large green winter apple. Only successful in a few sections.

**Ben Davis.** Well known red winter apple. Poor quality but popular for export market.

**Black Ben.** Resembles Ben Davis, but much darker in color and same quality.

**Bonum.** Red fall apple, medium size, excellent quality for export.

**Courtland.** Red winter apple. Seedling of McIntosh. Resembles the latter but hangs on the tree better. A popular apple on the New York market.

**Delicious.** Red and green striped. One of the best known winter varieties. Excellent quality.

**Duchess.** Red summer apple. Popular in home orchards as well as being a commercial variety.

**Early Harvest.** Well known early greenish yellow apple. Good in its season.

**Fall Pippin.** Yellow. An old-time fall apple having a place in every home orchard.

**Grimes Golden.** The most popular late fall and early winter yellow apple.

**Hyslop Crab.** Excellent for jellies.

**Jonathan.** A late fall, solid red export apple. Much in demand for exporting.

**King David.** Another medium size red late fall apple.

**M. B. Twig.** Large dark red. Long keeper. Good quality. Rather shy bearer.

**McIntosh.** Late fall and winter red apple. Popular in New York and New England States.

**Northern Spy.** An old favorite in the home orchard. Late fall. Red striped apple.

**N. W. Greening.** Large winter green apple.

**Paragon.** Resembles Black Twig but more abundant bearer.

**Rome Beauty.** A well known striped winter apple. Very near sweet.

**Smoke House.** One of our best known summer apples. Splendid home variety.

**Stayman.** One of our most popular commercial apples of the winter variety. Large red, green striped.

**Summer Rambo.** Undoubtedly one of the best summer varieties of its season. Large, striped, excellent quality. Ripens in August.

**Sweet Bough.** Summer Sweet Apple. Good quality. Ripens in July.

**Sweet Paradise.** Late fall green sweet apple. Good quality.

**Wealthy.** Fall red apple. Planted chiefly for export.

**Yellow Transparent.** The earliest apple on our list. A very popular early apple. Medium size and excellent for cooking purposes.

**Wms. Red.** Another popular export apple. Early fall, medium size, and red.

**York Imperial.** The most extensively planted apple in Virginia for commercial purposes. Greenish background, red cheek, good quality and keeper. In demand for both local and foreign markets.

### NEW VARIETIES OF APPLE

**Early McIntosh.** Red. Another member of the McIntosh family, but ripens earlier than the McIntosh. Prices same as Standard Varieties.

**Lowry.** Beautiful dark red winter apple, enjoying the reputation of selling for the highest price of any apple grown in Virginia. It sells for \$1.00 to \$2.00 more per barrel than any other variety. Always in demand both as a home variety and a commercial apple. The Lowry should be in every orchard whether home or commercial. 10c above Standard Varieties.

**Carolina Summer.** Mid-summer. Attractive red apple. Earliest bearer of any apple known. Trees often bear in two years after planting. Excellent export variety. Standard prices.

**Richared Delicious.** A "Super" Delicious. An apple with all the good qualities of Common Delicious: Same size, same shape, same flavor, same texture, and same ripening period. But the "Richared" Delicious colors two to three weeks earlier and colors solid red without trace or sign of stripe even into the stem and blossom ends! It can be picked "hard ripe" with full color. It has excellent storage qualities and is the most beautiful apple ever seen. Write for further information. The prices of the "Richared" are as follows:

	Each.	Doz.	100.	1000.
3-5 ft., 1 yr.	\$ 1.25	\$ 12.00	\$ 70.00	\$ 600.00
4-6 ft., 2 yr.	1.50	15.00	85.00	750.00

**Spy Rooted Trees.** Resistant against root rot. If you have lost trees from rot use our Spy Rooted trees for replacements. They are resistant to root rot and will insure you of much longer life trees. We can furnish the Spy Rooted Trees in the following varieties: Delicious, Grimes, Stayman, Winesap, York. Write for further information.

	Each.	Doz.	100.	1000.

## Peach

We are located in the heart of the commercial peach belt of Virginia and we grow Peach Trees in large quantities. Our soil is well adapted for growing peach in the nursery row as well as in the orchard, so we have made peach one of our specialties. Being in the commercial peach belt we have the advantage of studying the varieties in the orchard and know both the good and bad qualities of each variety. As far as possible we have tried to eliminate all varieties not worthy of growing, so while you will find that we do not list as many varieties as some do, you will also find that we have a splendid assortment of the better varieties. You will find that our list will cover the wants for both a home and commercial orchard.

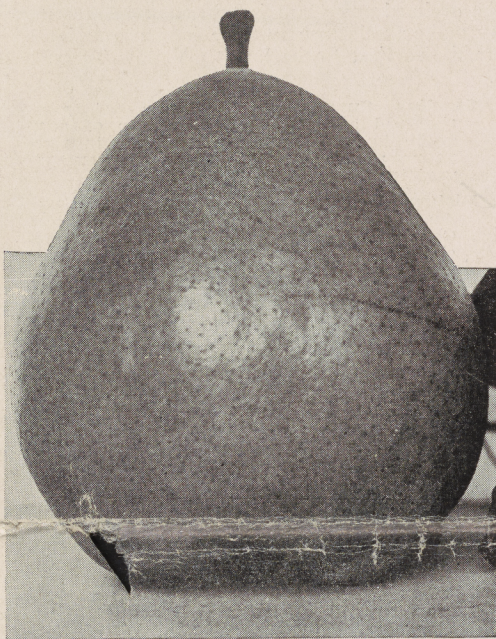

Our Peach are budded on old-time seedling variety found growing in the fence corners and the briar thickets throughout the Blue Ridge area, Southern Virginia and North Carolina. We find that this small seedling peach affords us the best of root stock and all of our peach is grown on this stock.

For your convenience we are listing the Peach in ripening order, so that in making a selection you can have the best in Peaches ripening from the earliest to the latest. If better description is needed, write us for our Descriptive Catalog.

Elberta Peaches.

## Cherry

No fruit has gained as much ground in the past few years as the Cherry. The new process of freezing cherries; furnishing them fresh from the storage has revolutionized the market. Cherries are now planted commercially. We offer a splendid selection of the most popular sour and sweet varieties which are best suited for home and commercial planters.

**Bing.** Good dark red sweet.  
**Black Tartarian.** Well known commercial sweet.  
**Early Richmond.** Best known sour.  
**Governor Wood.** Most popular wax variety.  
**Lambert.** Favorite dark purple sweet.  
**Large Montmorency.** Best large red sour.  
**Napoleon.** New wax variety. Yellow, red cheek.

Virginia.

Will you be good enough to quote me on 20 Norway Spruce, 4 ft. high? I have seen some very fine specimens of your Plants and Shrubs.

Governor Wood Cherries.

## Quince

A very popular fruit which is seldom found on the market, but always in demand. Quince on the market demand from \$3.00 to \$4.00 per bushel. Orange is the best variety. Champion is another good variety.

	Each.	Doz.
2 to 3 ft. Mail Order Size . . . \$ .75	\$ 7.50

## Plum

Plums require little space and are often planted in orchards between Apple Trees. We consider the following the most desirable varieties:

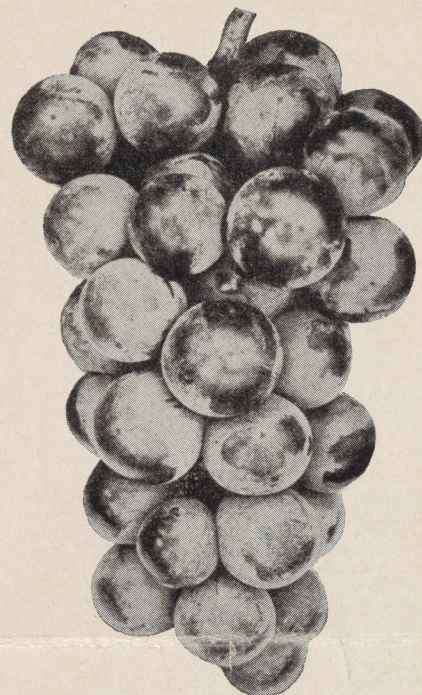

Abundance  
Burbank  
Damson  
German Prune  
Green Gage  
Lombard  
Red June  
Wickson

Plum Farmer Raspberries.

## Raspberries and Blackberries

Only a little space is required to grow enough berries for home use. Small space can be profitably devoted to growing berries. These small fruits are proving to be a profitable commercial crop.

### RASPBERRIES

**Cumberland.** Best purple.  
**St. Regis.** New, everbearing.  
**Cuthbert.** Well known red.  
**Plum Farmer.** Dependable black.

### BLACKBERRIES

**Early Harvest.** No doubt the best quality for home use. Very popular.  
**Eldorado.** Large, juicy, excellent flavor. Commercial variety.

### Prices

**Raspberries:** Per 25, \$2.00; \$6.00 per 100; per 1,000, \$45.00.  
**Blackberries:** Per 25, \$2.50; \$7.00 per 100; per 1,000, \$50.00.  
 Not less than 25 of any variety sold.

## Dewberries

\$4.00 per 100; \$35.00 per 1,000.

English Walnut.

## English Walnut

A nut that promises to become profitable and to be grown commercially in Virginia and adjoining States. It has been found by actual test that large English Walnuts can be as successfully grown in this section as anywhere in the United States. The trees thrive well and the nuts are of equally as good a quality as grown elsewhere. A tree about ten miles from us has been known to produce as much as \$80.00 worth of nuts in one season. We offer: Virginia thin shell, 18 to 24 in. mail order size, \$1.25 each; \$12.00 dozen 2 to 3 ft. \$1.50 each; \$15.00 dozen.

## Strawberries

Our collection of Strawberries will furnish berries from the earliest to the latest. By adding the everbearing you can have berries from early spring to late fall. Those who have not seen the Everbearing Strawberries no doubt consider it a novelty, planted only for the name of having a few berries out of season. If this is the impression that you have, you are wrong. The Champion Everbearing will bear abundantly throughout the fall. They continue bearing until freezing weather. We have tried out perhaps a dozen varieties of the Everbearing, but have found the Champion to be the best. It is true that the Mastodon is a larger berry, and many consider it the best, but we have not found it so. Our chief fault with the Mastodon is that it does not bear enough.

**Klondyke.** An old favorite. Early sweet.  
**Premier.** The most popular commercial variety, good size, excellent quality.  
**Dunlap.** Very large, good quality, mid-season.  
**Aroma.** The most extensively planted commercial variety. Mid-season.  
**Glen Mary.** Mid-season, large, commercial variety.  
**Big Joe.** Extra large. Mid-season.  
**Gandy.** An old favorite. Late.  
**Stephen's Late.** New late variety. Very popular.  
**Progressive.** Old-time favorite, everbearing.  
**Champion.** Most popular everbearing.  
**Mastodon.** New everbearing. Largest grown.

## Ornamentals

**Ornamental and Landscape Department.** From our selection of choice Shrubs, Evergreens, Shade Trees, Roses, Tuberous Plants and Perennials, a selection can be made suitable for any requirement.

**Landscape Service.** We employ a professional Landscape Architect and a number of practical well trained field men whose services are always available for our customers. If we can be of any service to you do not hesitate to call on us.

Our standard grade of stock is grown chiefly for the larger Landscape Developments and is not to be compared to light Mail Order Grades often quoted. Even the smaller stock we list as "Mail Order Grade" is well rooted, branched, and much of it will give immediate effect.

Butterfly Bush.

## Shrubs

Make use of our Landscape Department. We have established it for your benefit and at your command. If too far away for one of our Landscape men to see you, send in measurement of your grounds and a photo of the house for suggestions.

## Privet Hedge

Privet Hedge is much cheaper than fences and much more attractive. They beautify your home without extra expense.

### CALIFORNIA PRIVET

Our California Privet is not to be compared with smaller lighter grades of the same height, which are often offered the trade. Our Privet is grown in the field, cultivated in nursery rows, and the 2-year-old has been cut back to the ground one season which causes it to be heavily branched, and to develop a better root system. Therefore, it will make you a beautiful hedge much quicker than the small plants of equal height.

## Evergreens

Seldom do we attempt an Ornamental Planting without the use of Evergreens. They are especially useful, as they are beautiful the entire year, and are more appreciated during the winter when Deciduous Shrubs are barren. Our Standard Size Evergreens are carefully dug with balls of earth, securely packed and sent out fresh. Being handled in this way and having the advantage of the fibrous root system which our soil produces, our Evergreens will give you excellent results.

For the benefit of those who are not in position to make a complete Evergreen planting of the Standard Sizes, we are offering what we term as "Mail Order Sizes." Evergreens furnished under this grade are beautiful little specimens and will make a good showing at the time of delivery.

## Gladiolus

If there is a more popular flower for cutting and more easily grown we do not know of it. Gladiolus bloom within ten weeks from time of planting and continue to bloom through late summer and fall. They should be planted at intervals of about two weeks apart. By making your first planting the 1st of May and continuing planting at intervals of every two weeks until the middle of July you can have blossoms from middle of July until frost.

By all means plant some of the Autumn Queen. This odd variety should be planted in early spring in order to get best results. Unlike most of the other varieties the Autumn Queen will bloom from the 1st of September until frost. The spikes will often be 3 to 4 ft. long. In Gladiolus we offer the following:

A good mixed assortment...	Doz.	100.

## Cannas

Great improvement has been made in Cannas in the last few years; not only in the color and size of bloom, but the extension of the blooming period. New varieties now blossom throughout the fall instead of a couple of weeks as the old varieties did.

Choice named varieties.....\$1.25 Doz. 100. \$8.00  
Good assorted mixed.....1.00 6.00

Among the named varieties we offer:

**Eureka.** Most popular pure white. 3 to 4 ft. in height.

**Indiana.** Golden orange. Green foliage. Medium height.

**King Humbert.** Orange-scarlet. Broad green leaf. Strong grower.

**President.** Red-crimson. Most popular Red Canna grown. 3 to 4 ft. in height.

**Yellow King Humbert.** Yellow dotted orange. Vigorous. Free bloomer.

Unlike the old varieties the Improved Varieties bloom throughout the fall. Every garden should have Canna beds.

All Red "August Color" Still Green

Reproduced from Fruit and Photograph

This is not a picture of two mature Delicious Apples, but shows the contrast between a "Richared" and an ordinary Delicious, both picked same day, same orchard, from adjoining trees in late August.

While "Richared" Delicious colors solid red (no stripes) weeks earlier than common (striped) Delicious, and can be picked while "hard ripe," it is identical with the common Delicious in shape, size, texture, flavor and ripening period.

Do not confuse this "Wonder" apple with other so called Red Delicious. This is the original and only "Richared" Delicious, the Apple Supreme.

It was discovered at Wenatchee, Washington and in 1927 composed 75 per cent of all new plantings in that great fruit section. We recently acquired propagation rights for growing and selling this wonderful new Apple in the East and will have trees for delivery Spring 1929.

Get in on this new Apple by placing your order now.
